Spring Boot · Spring Data · Android Development · NodeJs · ReactJs · Spring Security · JavaScript · IOS Development · Core Java · Data Structure · HTML · MySql · C++ · UiPath · RPA · Linux · Azure

PERSONAL PROJECTS

Courier Management System
- In today's fast-paced world, efficiently managing deliveries of items like furniture, electronics, and gifts is crucial. We have developed a cutting-edge Courier Service Management Software to streamline logistics. This online solution ensures secure transport, and timely delivery of goods from origin to destination.

Women Safety Android App
- When user feels any kind of danger around her using the features like alerting, messaging the current location through SMS or scanning the QR code and send QR code details via SMS using this Application.

Outbound Calling Bot For College Admission Using RPA
- This project used UiPath to automate outbound calls to potential college students for admission and capture their feedback using voice recognition technology. The bot extracted and processed the data from the feedback and saved it in the college's database. The project demonstrated the use of RPA to streamline the admission process and improve efficiency and accuracy.

ACHIEVEMENTS

Microsoft AZ-900
Completed Microsoft azure fundamental AZ-900 certification

AWS Partner: AWS Cloud Practitioner Essentials (Classroom)
Completed AWS Partner: AWS Cloud Practitioner Essentials (Classroom) training
